System Requirements

Customer Priority Legend
1 – Base Functionality Must Have The functionalities that must be implemented to produce the minimum viable product. In most cases, these functionalities are searching by keywords, account logging in, creating/displaying profile, and showing events.
2 – Base Functionality Should Have The functionalities that should be implemented for which will significantly affect the user experience of the product and eventually elevate the whole product to a new level.
3– Customer Nice to Have Functionalities that are not necessary but nice if available to customers.
4 – Project Team Nice to Have Functionalities that are like add-ons, which the team feels nice to present them to the customers.

SR01 Sign Up

Project priority: 1

The system shall allow the users to register and input email addresses and passwords. Such data is stored into Account model.

Status: Done

None

SR02 User Creation

Project priority: 1

The system shall ask the users to fill up personal information and save it in the User model.

Status: Done

UC 1

SR03 Sign In

Project priority: 1

The system shall allow registered users to log into users' own account by validating user's input credentials.

Status: Done

UC 2

SR04 Password Recovery

Project priority: 1

The system shall allow registered users to recovery password by sending user an email containing the link to reset password. The new password in the Account model to replace the old password.

Status: Done

UC 1, UC 2 & UC3

SR05 Change Password

Project priority: 1

The system shall allow registered users to change their old password to a new one. New password will be saved and update to database.

Status: Done

UC 2

SR06 View User Profile

Project priority: 1

The system shall allow registered users to view users' own profile pages.

Status: Done

UC 1, UC 2 & UC 3

SR07 Upload Resume

Project priority: 1

The system shall allow registered users to upload resumes and save the resumes into the database.

Status: Cancelled

UC 1, UC 2 & UC 3

SR08 Edit Profile

Project priority: 1

The system shall allow registered users to edit profile. All changed information will be saved in database.

Status: Done

UC 1, UC 2, UC 3 & UC 6

SR09 Change Profile Photo

Project priority: 2

The system shall allow registered users to change profile picture. The users choose the new picture and it will be uploaded to the database, the new profile photo will show on the profile page.

Status: Cancelled

UC 6

SR10 View Profile Information

Project priority: 1

The system shall allow registered users to view their personal information on the profile page.

Status: Done

UC 6

SR11 Log Out

Project priority: 1

The system shall allow the users to log out if users have already login. The users' status will change to offline when the users log out.

Status: Done

UC 3

SR12 Accessing Personal Links

Project priority: 2

The system shall allow the users who have created accounts to access personal link through the profile page.

Status: Done

UC 6

SR13 Accessing Useful Links

Project priority: 2

The system shall allow the users to access other links through the profile page.

Status: Done

UC 6

SR14 Calendar Plan

Project priority: 2

The system shall display the events that the user has decided to go when it reaches the data of the events.

Status: Done

UC 6

SR15 View All Events

Project priority: 1

The system shall allow all users to view all the events from the database.

Status: Done

UC 3

SR16 Add Event to Favorite

Project priority: 1

The system shall allow users who have account on the website to categorize the events that the users like or the users want to go as favorite. The events that are marked as favorite will be stored in the database.

Status: Done

UC 15

SR17 Remove Favorite Event

Project priority: 1

The system shall allow registered users to remove the favorite event that users do not want any more in the favorite event list. The user's information about favorite event will be saved and upload to the database.

Status: Done

UC 6 & UC 15

SR18 View Favorite Events

Project priority: 1

The system shall allow registered users to view favorite event list where stores users' favorite events.

Status: Done

UC 6

SR19 View Events Information

Project priority: 1

The system shall allow registered users to view the detail of certain events by clicking into the event cards.

Status: Done

UC 18

SR20 Filter by Today (Event)

Project priority: 1

The system shall allow all users to select the events that are only happening today. Events that happen today will be pulled from the database.

Status: Done

UC 15

SR21 Filter by this Week (Event)

Project priority: 1

The system shall allow all users to select the events that are only happening in this week. Events that happen this week will be pulled from the database.

Status: Done

UC 15

SR22 Filter by this Month (Event)

Project priority: 1

The system shall allow all users to select the events that are only happening during this month. Events that happen during this month will be pulled from the database.

Status: Done

UC 15

SR23 Go Event

Project priority: 1

The system shall allow registered user to click “go” button in the bottom of event card to remind them to go to the event.

Status: Done

UC 15 & UC 18

SR24 Not Going Event

Project priority: 1

The system shall allow registered user to click “go” button in the bottom of event card to remind them to go to the event.

Status: Done

UC 23

SR25 View All Jobs

Project priority: 1

The system shall allow all users to view all the jobs from the database.

Status: Done

UC 3

SR26 View Job Information

Project priority: 1

The system shall allow the users to view the information regarding the job when the users click the title of the job in the job cards.

Status: Done

UC 25

SR27 Add Job to Favorite

Project priority: 1

The system shall allow the users who have account on the website to categorize jobs that the users think are favorites. The jobs that are marked as favorite will be stored in the database.

Status: Done

UC 25

SR28 Remove Favorite Job

Project priority: 1

The system shall allow registered users to remove the favorite job that users do not want any more in the favorite job list. The users' information about favorite job will be saved and upload to the database.

Status: Done

UC 25 & UC 29

SR29 View Favorite Jobs

Project priority: 1

The system shall allow registered users to view favorite jobs added by users in the favorite job list.

Status: Done

UC 6

SR30 Apply Jobs

Project priority: 1

The system shall allow registered users to apply the certain jobs and they will be redirected to the official source link of that job.

Status: Done

UC 3

SR31 Search by Keywords (Job)

Project priority: 1

The system shall allow all users to search desired jobs by keywords. The jobs that match the keywords will be pulled from the database

Status: Done

UC 25

SR32 Filter by Constraints (Job)

Project priority: 1

The system shall allow all users to filter the list of jobs according to the filters users select such as work authorization, degree, and work duration. The jobs that satisfy the filters will be pulled from the database.

Status: Done

UC 25

SR33 View Referral

Project priority: 1

The system shall allow all users to filter the list of jobs according to the filters users select such as work authorization, degree, and work duration. The jobs that satisfy the filters will be pulled from the database.

Status: In Progress

UC 3

SR34 Add Referral

Project priority: 1

The system shall allow users who have accounts on the website and can offer referral to add referral to the website. The information of referral will be stored in the database.

Status: Done

UC 1, UC 2, UC 3 & UC 6

SR35 Toggle Referral Opportunity List

Project priority: 1

The system shall allow the users who have accounts and have already posted the referral to change the status of the referral. The status of the referral are available and not available.

Status: Done

UC 1, UC 2, UC 3 & UC 6
